

## PYTHON SOFTWARE INSTALLATION

The screenshot shows a web browser window with the URL `python.org/downloads/release/python-374/`. The page features a dark blue header with the Python logo, a search bar, and navigation links. Below the header, the main content area is white and displays the title "Python 3.7.4" in a large, bold font. Underneath the title, the release date "Release Date: July 8, 2019" is shown. A note explains that this is a bugfix release for the legacy 3.7 series, currently in the security fix phase of its life cycle. It also mentions that the final bugfix release with binary installers for 3.7 was 3.7.9. A section titled "Among the major new features in Python 3.7 are:" lists two items: "PEP 539, new C API for thread-local storage" and "PEP 545, Python documentation translations". At the bottom of the browser window, a taskbar shows the Windows logo, a search bar, and several application icons. A notification for "python-3.7.4-amd64.exe" is visible in the bottom right corner of the browser window.
